

ARO TECHNOLOGIES

Technology that moves your business forward.

Websites • Digital Platforms • AI • Automation • Digital Management

We design, build and manage practical digital solutions that help organisations work smarter, improve customer experiences and grow.

Technology built around your business.

ARO Technologies works with organisations to design, build and manage digital products that solve real business problems.

From launching a professional website to developing a bespoke internal platform or automating repetitive business processes, we combine modern technology with practical business thinking.

Understand the problem → Design the solution → Build → Launch →
Support & Improve

We work with businesses across the UK, Nigeria and internationally and provide solutions that can grow alongside our clients.

What We Build

01

Website Design & Build

Professional, responsive websites designed around your organisation, customers and brand. Corporate, SME, hospitality, property, ecommerce & portfolio sites.

From £300

02

Website Development

Develop, rebuild, improve or extend an existing website — new functionality, redesigns, mobile optimisation, ecommerce, integrations and performance improvements.

03

Design, Build & Management

An end-to-end service: we design, build, launch and continue managing your website — content updates, maintenance, support, analytics and improvements.

Retainers from £80/month

04

Bespoke Digital Platforms

Custom platforms to run your operations: employee & client portals, CRM, recruitment, booking, dashboards, timesheets, workflow and reporting tools.

From £450

05

AI & Automation

Reduce repetitive work with automated workflows, AI-assisted processes, lead management, notifications and data processing — via Make.com, AI tools & APIs.

06

AI Voice Agents

Intelligent voice agents for customer enquiries, appointment booking, lead qualification, out-of-hours calls and call routing.

Modern technology. The right tool for the job.

ARO Technologies uses a combination of modern development, low-code, automation and AI technologies to deliver solutions efficiently.

Lovable

Rapid digital product & platform development

Replit

Development, prototyping & deployment

Make.com

Workflow & process automation

Wix Studio

Professional websites & digital experiences

WordPress

Flexible website & content management

Figma

UI/UX design & prototyping

Microsoft 365 / Power Platform

Business systems & internal portals

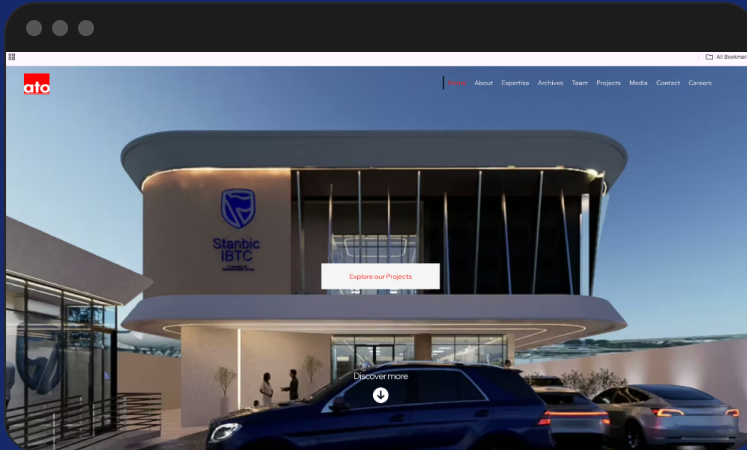

AI & API Integrations

Connecting intelligent tools into workflows

"We don't force every client onto the same technology. We select tools based on the problem, budget, timeline and long-term requirements."

SELECTED PROJECTS

Technology we've delivered.

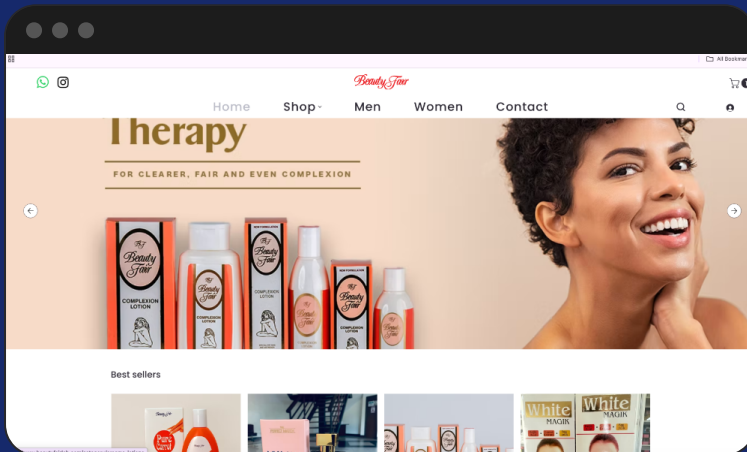

ATO Architects

Website & Digital Platform Development

Challenge: A growing architecture practice needed a modern web presence and internal tooling.

Solution: Modern website plus ongoing development of a bespoke organisational portal.

Outcome: Stronger digital presence and streamlined internal operations.

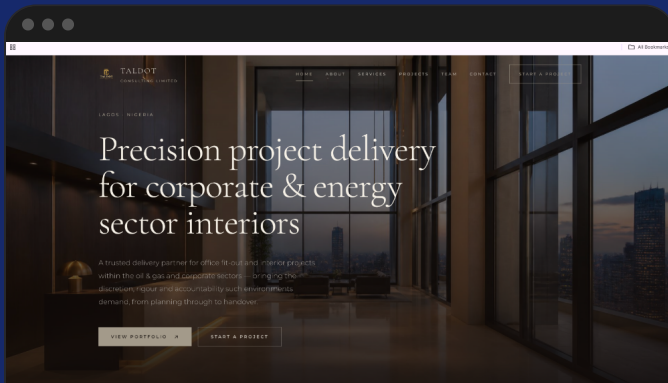

Beauty Fair Laboratories

Website Design & Ecommerce Development

Challenge: An established cosmetics brand needed a modern, ecommerce-ready presence.

Solution: Redesigned digital experience with improved product presentation and navigation.

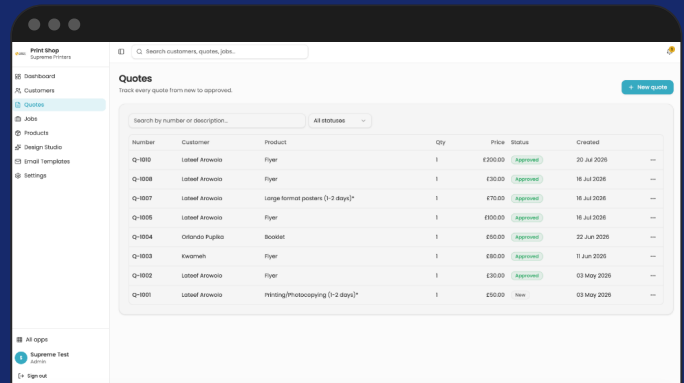

Outcome: Readiness for direct-to-consumer growth.

Taldot Consulting

Website Design & Build

A precision project delivery partner for corporate and energy-sector interiors in Lagos, Nigeria — a premium website showcasing its portfolio to corporate clients.

Supreme Printers

CRM & Operations Platform

A tailored CRM and operations platform centralising customer records, quotes, job tracking and invoicing — improving efficiency and visibility across the customer journey.

From idea to launch

1

Discover

We understand your organisation, users, challenges and objectives.

2

Design

We map the experience and determine the most effective solution.

3

Build

Our team develops and tests the website, platform or automation.

4

Launch

We support implementation and ensure the solution is ready for real users.

5

Manage & Improve

Where required, ARO continues supporting, managing and improving the product.

Need something quickly?

Our use of modern development tools allows us to prototype and launch many digital solutions significantly faster than traditional development approaches.

PRICING

Technology doesn't need to cost a fortune.

One of ARO Technologies' key propositions is making professional digital development accessible to growing organisations.

ARO TECHNOLOGIES

Why work with us?

Practical, not complicated

We focus on solving the business problem rather than introducing unnecessary technology.

Cost-conscious development

Modern technology lets us deliver powerful digital products without traditional agency-level costs.

End-to-end support

From initial idea and design through to development, launch and ongoing management.

Rapid development

Our technology stack enables us to prototype, test and improve products quickly.

Flexible partnerships

Work with us on a one-off project or retain ARO as your ongoing technology partner.

Business-first thinking

Technology is only valuable when it improves operations, customer experience or revenue.

The people behind the technology.

Lateef Arowolo

Founder / Product & Technology Lead

Lateef leads strategy, product direction and technology delivery across ARO. With a background spanning product management, digital transformation and IT consultancy, he focuses on translating business problems into practical, scalable digital solutions.

His role includes product strategy, solution design, client engagement, AI and automation strategy, and overseeing delivery from concept through to launch.

London, UK

Timileyin Ogundare

IT Consultant / Developer

Timileyin designs, builds and maintains websites and supports ARO's technology projects from development through to implementation.

A Computer Science graduate, his work spans web development, digital systems, performance and technical delivery, helping ensure ARO's digital products are reliable, usable and scalable.

Lagos, Nigeria

Have an idea? Let's build it.

Whether you need a new website, a bespoke business platform, an AI-powered workflow or simply someone to manage your existing digital presence, ARO Technologies can help turn the idea into something practical.
